

Vitalité Collection

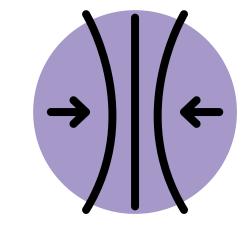

Why this matters

Vitalité Active Compression Collection

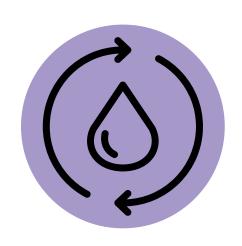

Optimized warm-up and flexibility

By promoting faster blood flow, this fabric accelerates warm-up times, enhancing flexibility and readiness for peak performance.

Medical-grade support for active recovey

Designed to deliver therapeutic-level compression, this fabric aids in reducing tissue inflammation, relieving strain on muscles and joints, and promoting faster recovery from physical exertion.

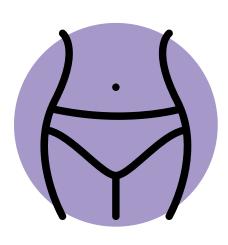

Improved circulation and detoxification

By increasing blood and oxygen flow, this fabric helps flush ou metabolic waste and lactic acid buildup, reducing soreness and supporting efficient muscle recovery post-exercise.

Antibacterial and odor control

Infused with antibacterial properties, this fabric helps control odor, keeping you fresh and confident throughout the day, even during intense physical activity.

Core muscle support

Provides targeted compression around the torso, supporting core muscles to reduce fatigue, enhance posture, and improve body alignment, contributing to better endurance during movement.

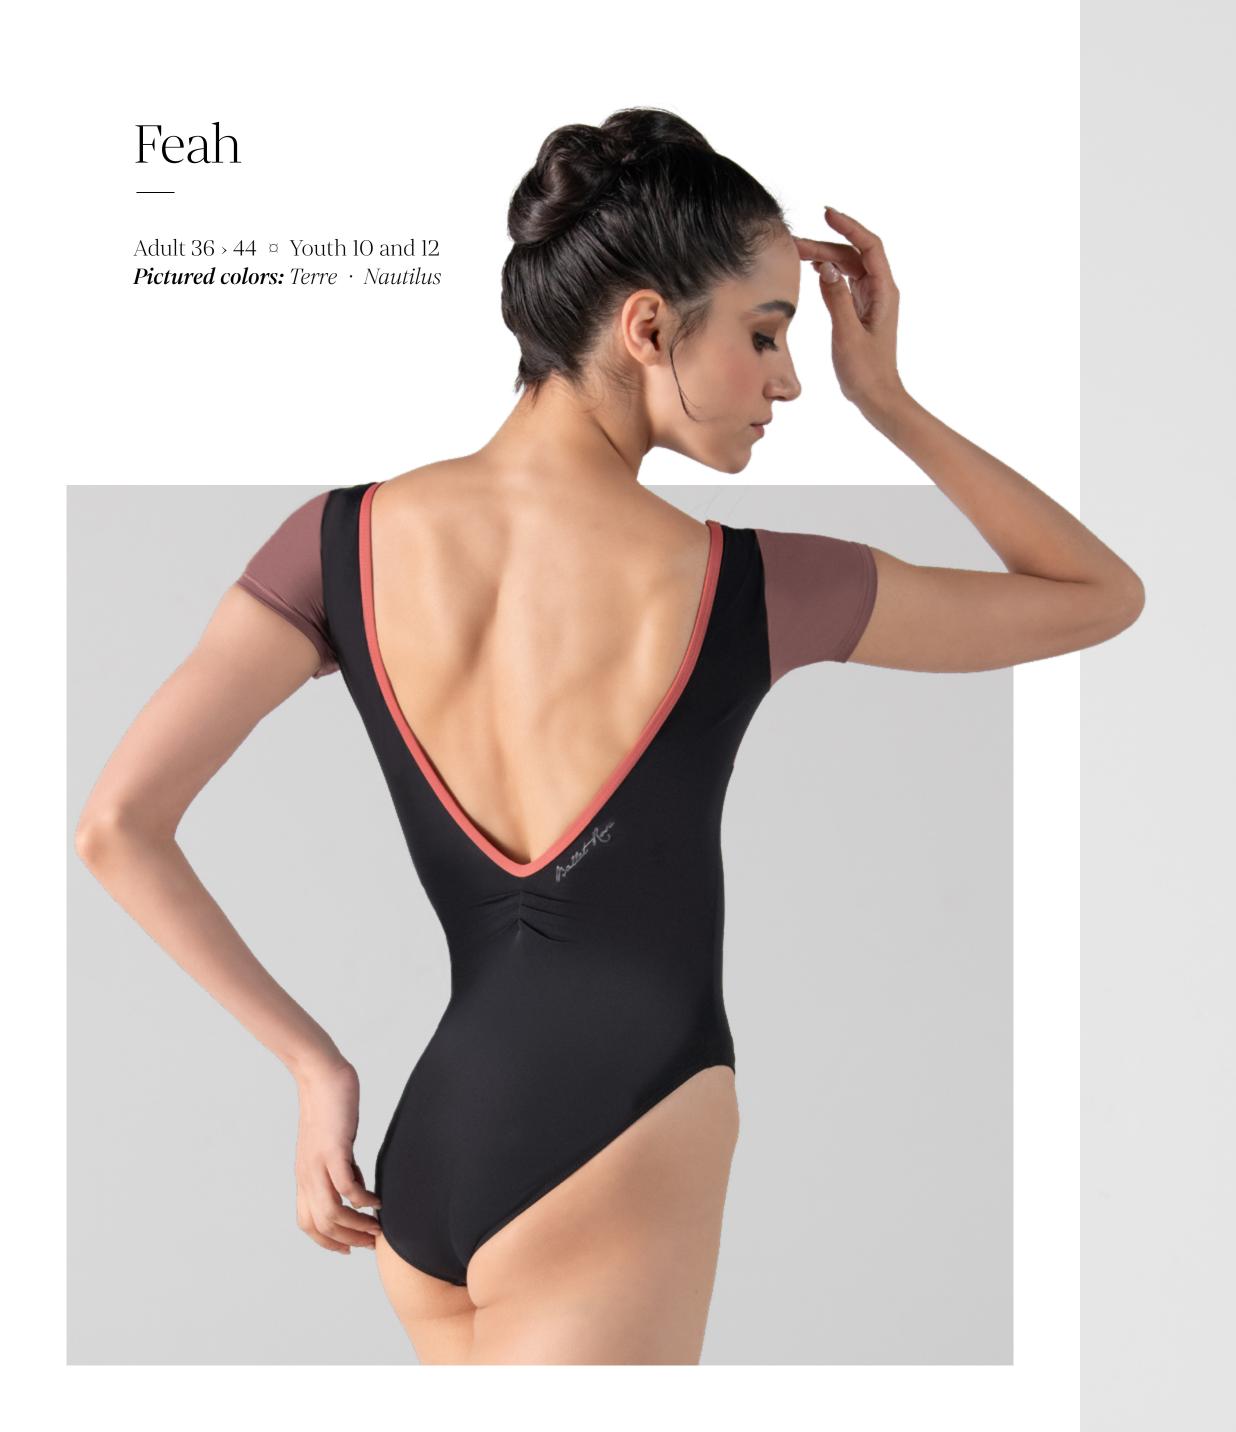

Enhanced durability and comfort

Crafted for long-lasting wear, this fabric provides exceptional comfort while standing up to intense use, ensuring reliable performance over time.
